00:00:00:09 - 00:00:07:15

Tax engines are powerful, but they need to be tuned to work with your systems, your processes, and your compliance needs.

00:00:08:01 - 00:00:16:28

The right tuning requires a complex balance, and you can lose that balance when tax rules, rates, legislation and other factors change.

00:00:17:18 - 00:00:25:10

To keep your tax engine tuned, you need the right tech, trusted advisors, and an effective implementation methodology.

00:00:25:25 - 00:00:27:20

You need streamlined optimization.

00:00:27:20 - 00:00:29:23

To streamline your optimization, make it dynamic, automated,

00:00:32:16 - 00:00:34:24

that's the power of te.x, an alyx solution powered by Grant Thornton.

00:00:37:24 - 00:00:41:18

te.x helps us combine the knowledge of our tax professionals with tailored technology to streamline the tax engine implementation process.

00:00:46:26 - 00:00:55:29

te.x understands your business and master data using advanced analytics to uncover insights and bring your tax engine to life.

00:00:56:14 - 00:01:04:22

It helps you accelerate implementation, lower costs, reduce resource demands, and customize your scope for better value.

00:01:05:00 - 00:01:13:17

Then te.x provides continual testing and health checks that keep you informed about your environment while updating documentation.

00:01:13:27 - 00:01:24:11

The result, streamlined implementation for your tax integration now and for updates into the future, all from a tool that uses your data to automate your work.

00:01:24:27 - 00:01:16:20

This is te.x, with help from alyx.
